TURFGRASS MIXES: SPECIALTY MIXTURES

PACIFIC SHADE

6 lbs. per 1,000 sq. ft or 250 lbs/acre

- 30% Manhattan V GLR Perennial Ryegrass
- 25% Fortitude Creeping Red Fescue
- 25% Intrigue Chewing Fescue
- 20% Cypress Poa Trivialis

A mixture of a special shade tolerant bluegrass with shade-tolerant fine fescues and a top-rated perennial ryegrass. Produces a medium green turf where most grasses become too thin because of shade. Especially useful in shady, moist conditions but does well under normal moisture conditions. Use in lawns, parks, cemeteries where shade is the limiting factor.

SALT-TOLERANT TURFGRASS PARK MIX

8 lbs/1,000 sf or 350 lbs/acre

- 20% Arena Perennial Ryegrass
- 20% Coliseum Perennial Ryegrass
- 20% Fiesta 3 Perennial Ryegrass
- 20% Manhattan 5 GLR Perennial Ryegrass
- 10% Midnight Kentucky Bluegrass
- 10% SeaLink Slender Creeping Red Fescue

This mix is based on currently available information regarding the germination and survival rates for different varieties of perennial rye, Kentucky bluegrass, & fine fescues. The most resilient, grassy lawn for planting on sites with challenging water & soil qualities.
