

SEED & SUPPLIES FOR NORTHERN CALIFORNIA

TURFGRASS MIXTURES: SPORTS USE

PACIFIC 4-SEASONS 70/30 MIX *8-10 lbs/1,000 sf or 350-435 lbs/acre*

35% Grande II Tall Fescue
35% 2nd Millennium Tall Fescue
15% Arena Perennial Ryegrass
15% Fiesta 3 Perennial Ryegrass

This mix offers the water-saving and tough-leaf tissues of turf-type fescue with two varieties of perennial ryegrass selected for their salt tolerance and exceptional winter growth activity. With higher maintenance and taking advantage of opportunities for overseeding, this mix can provide a dense, uniform, drought-tolerant sports turf surface all year round. Wear tolerant. Salt tolerant.

*

SPORTSCLUB 4-SEASONS RYE BLEND *8 lbs/1,000 sf or 350 lbs/acre*

25% Arena Perennial Ryegrass
25% Coliseum Perennial Ryegrass
25% Paragon GLR Perennial Ryegrass
25% Protégé GLR Perennial Ryegrass

Most elite varieties of perennial ryegrass establish quickly and are readily overseeded. The exceptional summer heat tolerance and winter growth of the Arena and Coliseum combined with the disease resistance of the Paragon and Protégé varieties add year-round value to this blend.

*

SPORTSCLUB FAST TRACK RYE BLEND *8 lbs/1,000 sf or 350 lbs/acre*

34% Evening Shade Perennial Ryegrass
33% Paragon GLR Perennial Ryegrass
33% Protégé GLR Perennial Ryegrass

For rapid establishment and quick recovery, this affordable 3-way perennial rye blend can't be beat. Takes close mowing and responds quickly to overseeding.

SEED & SUPPLIES FOR NORTHERN CALIFORNIA

SPORTSCLUB SALINE PERENNIAL RYE BLEND *8 lbs/1,000 sf or 350 lbs/acre*

- 25% Coliseum Perennial Ryegrass
- 25% Fiesta 3 Perennial Ryegrass
- 25% Manhattan V GLR Perennial Ryegrass
- 25% Brightstar SLT Perennial Ryegrass

In situations where salty soils, water quality, or other environmental factors pose a challenge to typical varieties of perennial ryegrass, this selection provides the best chance for success in terms of germination, seedling growth, and long term survival. Overseeding.

*

SPORTSCLUB 80/20 RYE/ BLUE *8 lbs/1,000 sf or 350 lbs/acre*

- 27% Protégé GLR Perennial Ryegrass
- 26% Paragon GLR Perennial Ryegrass
- 26% Manhattan 5 GLR Perennial Ryegrass
- 10% Brooklawn Kentucky Bluegrass
- 10% Rugby Kentucky Bluegrass

A combination of fast-growing perennial ryegrass and sod-knitting Kentucky bluegrass can help maintain the hardest working athletic fields in top condition, especially where the opportunity for cool-season overseeding with perennial ryegrass exists. Wear tolerant.

*

SPORTSCLUB '60/40' TOURNAMENT BLUE/RYE MIX *5-6 lbs per 1,000 sq.ft. or 225-250 lbs/acre*

- 20% Boutique Kentucky Bluegrass
- 20% Midnight Kentucky Bluegrass
- 20% Limousine Kentucky Bluegrass
- 13.4% Coliseum Perennial Ryegrass
- 13.3% Manhattan 5 GLR Perennial Ryegrass
- 13.3% Paragon GLR Perennial Ryegrass

SEED & SUPPLIES FOR NORTHERN CALIFORNIA

A combination of elite bluegrasses and select perennial ryegrasses has long been the playing surface of choice for sports turf managers with opportunities to keep a durable, well-groomed turf. The perennial ryes provide quick germination while the Kentucky bluegrasses give the field more durability to hold up under heavy traffic. Wear tolerant, Sod match.

*

SPORTSCLUB 75/25 SALINE RYE/BERMUDA MIX

*6-7 lbs. per 1,000 sq.ft.
or 250-300 lbs/acre*

37.5% Brightstar SLT Perennial Ryegrass
37.5% Manhattan V GLR Perennial Ryegrass
25% Blackjack Bermudagrass

When temperatures soar, “Blackjack” bermudagrass can provide a dense and durable play surface which can be mowed at 1½ inch in cooler season. Combining this seeded bermudagrass with two of the top-performing perennial ryes allows for overseeding of both the warm and the cool season species and helps to keep the playing surface usable year round. The enhanced salt tolerance of the Manhattan V and Brightstar SLT compliment the natural adaptability of the bermudagrass to saline conditions.
